## **Recycling Program:**

Our longtime recycling program of laser jet and ink jet printer cartridges now includes cell phones. Over the life of this program thousands of printer cartridges and hundreds of cell phones have been recycled, keeping them out of the waste stream and landfills and reducing the cost of making and purchasing these items.

Borough & township governments and businesses volunteer as collection sites for the cartridges and cell phones. The items to be recycled are picked up monthly or as needed. The cartridges and cell phones are identified, packaged and shipped to recyclers for reuse. Funds obtained from this recycling program help support our SEC activities.

Interest in the SEC recycling program should be directed to the SEC Coordinator on 215-362-7432 Ext. 224.
