## West Branch of the Neshaminy Creek:

The SEC's site 72 is located on the West Branch of the Neshaminy Creek in Hatfield Township. This section of the creek runs through a residential area, however it is approximately one mile below the Lansdale waste water treatment plant. The site can be accessed from Stewart Drive by walking along side or through a catch basin. One side of the site is border by homes and the Kulp School, the other by a township greenway. This site has been monitored since March, 1998.
