## East Branch of Perkiomen Creek:

The SEC's site 8 is located on the East Branch of Perkiomen Creek in Upper Salford Township. This section of the creek runs through a rural area of Montgomery County. However, it runs through the boroughs of Sellersville and Perkasio in Bucks County and a large portion of its water originates from the Delaware River via the Point Pleasant pumping station. This site's stream flow is measured by the USGS, their stream flow measurement data can be obtained from their internet site. The site can be accessed at Bergey Mill Park, off of Bergeys Mill Road. This site has been monitored since April, 1998.

| Last 4 Water Quality Rating's |                     |        |      |          |
